Online training dates for your diary in November!

Helping you solve your EMC problems

EMC at PCB and system level with Keith Armstrong

 Thursday, 18 November 2021 at 08:00

We are offering the opportunity to become an expert in designing PCB:S, equipment, installations and electrical systems without having to worry about failing EMC tests. These two events will provide you with the tools needed to save both cost and money and maximizing your chances to pass EMC test on the first try.

Join us in this extensive "designing for good EMC" training and design your electronics correct on the first try.

- The EMC for PCB is 18 -19 of November.
- The EMC for systems, installations and equipment is 25 -26 of November.

Register below on one or both dates. The webinar will be in English and Webex(no download or software needed, link will
